SKILLS

CODING
Most comfortable with
Ruby • Rails • JavaScript • SQL
HTML • CSS • Sass • Bootstrap
jQuery • AJAX • Chart.js • Jekyll
Working knowledge of
Python • Java • AWS • PostgreSQL
Have dabbled in
AngularJS • React • Node • Docker

LANGUAGES
Fluent
Mandarin • English • Sichuanese
Competent
Cantonese • Japanese

EXPERIENCE

PORT ZERO VENTURES, LLC | Software Developer Intern
Jan 2019 – Present | Madison, WI
- I build custom domain models and user interfaces with an **Agile** development team using **Ruby on Rails**.
- I engage in design discussions with my peers, mapping requirements to tools and their tradeoffs.

BAOZI TUTORS | Software Developer Intern
Jan 2018 – Dec 2018 | Hong Kong
- I collaborated with the two co-founders at Baozi Tutors in constructing this website from scratch using **Ruby on Rails** and a test-driven, iterative workflow.
- I helped with frontend design using **Bootstrap**, **Sass**, **jQuery** and **AJAX**.
- I assisted with the backend integration of **Stripe** to handle payments.

DROIDHANG TECHNOLOGY | Digital Marketing Specialist
Aug 2017 – Dec 2017 | Hong Kong
- I was in charge of managing Droidhang's Google AdWords accounts and UAC campaigns; I adjusted billing, budget and marketing content based on analysis of campaign performance data.
- I spent over 5 million USD on behalf of Droidhang over the course of five months. The campaigns that I managed achieved an average second-day user retention rate of 35% and an average seven-day ROI of over 20%.
- I assisted with AdWords marketing content creation.

PROJECTS

- **Twitter Clone 2.0** | I built this **Ruby on Rails** app from scratch. It has a complete user authentication system and micropost functionality. I also added the ability to comment on posts, and to 'like' both posts and comments. I implemented persistent image storage with **Amazon S3** buckets.
- **Twitter Clone** | I built this application while following along with Michael Hartl's **Ruby on Rails** Tutorial. I implemented persistent image storage with **Amazon S3** buckets. I also added comment functionality to posts, a feature not present in the tutorial itself.
- **My Blogging Site** | A mainly static site I built with **HTML5**, **CSS3**, and **Jekyll**. I implemented a dynamic image gallery for it using **JavaScript**.
- **Panda Visas** | A web platform for sharing U.S. visa application experience. I'm building this site with **Rails**, **Bootstrap**, and **jQuery**.
- **Hello Ruby** | My solutions to Project Euler problems in **Ruby**.
- **Turtle Drawers** | A few **Python** scripts I wrote that draw interesting shapes.

AVAILABILITY

Available from Feb 15, 2019
